Your annual fee for this package with twin immersion is £180.00*

The annual inspection will be completed on or before the renewal date of the service package

*All prices are subject to VAT

General Terms and Conditions.

To start your cover, an inspection may need to be completed, unless there is already a current Gas Safety Certificate in place on the property. If not, a Landlords Gas Safety Certificate will be completed and sent out along with a covering letter reporting any issues.

The date on your Welcome Letter will be the start date for your policy and the annual renewal date. An annual Landlords Gas Safety Certificate will be completed on, or before that date.

Any existing fault found on the first inspection will be dealt with on a case by case basis.

Any boiler of an age will be taken care of, as long as parts are still available. All efforts will be made before condemning a boiler.

Any Boiler or Cylinder replacements, including labour, are not covered.

Any damage caused by gaining access to any problem ex: boxing surrounding leaking pipes, will not be covered and will carry a charge. This will be discussed with you before going ahead with any work.

When taking out a Landlords Package you will be tied in for a minimum of four months.

If any major works have been carried out, you will be tied into the policy until its next renewal date, or a part payment can be arranged.

All contracts will annually renew automatically on the date that is on your Welcome Letter. If you do not want to renew your policy then you need to give not less than 30 days written notice from this date.

You will be notified of any changes to the policy in writing, not less than 60 days before your annual renewal date.

To cancel the policy you will need to give no less than 30 days written notice.

I will give an honest assessment of any situation and offer options on the best, and most cost effective, course of action. However, if you choose not to go ahead with any advised works and the fault reappears, that fault and any resulting damage will not be covered. Ex: If a fault is found to be caused by sludge in the system, I would treat the problem and recommend that you fit a magnetic cleaner at a one off cost. If you choose not to fit the cleaner then any future problem cause by sludge would not be covered.

Any damage caused by water ingress, of any kind, to electrical components will not be covered under the service package. Charges will be applied.

Faults with the main heat exchanger i.e. cracks or corrosion, are not covered under the agreement and will be dealt with by mutual goodwill from both parties.

If an intermittent fault is presenting, all attempts at fault finding will be carried out. Parts will not be fitted until a fault can be established.

We aim to be out to the property the same working day, and within 24hrs at all other times.

24hr Callouts requires there to be danger to life or damage to the property. Steps must be taken by the occupier to isolate the water/- gas supply in the event of a water/gas leak.

Recharging heating systems will be chargeable if the occupier has not taken reasonable steps with guidance over the phone.

You are buying into a small, family run business and you will be dealing with myself and my partner, not a call centre. I provide an honest, reliable and personal service. As there are very few terms and conditions attached, a certain level of trust and good faith will need to be entered into by both parties. I will endeavour to provide the best level of service and care I can. I would appreciate prompt access to the properties concerned, prompt payments, and 'fair use' of the unlimited 24hr callouts'.
